BE SAFE BE SMART

PROTECT YOUR TEAM AND THE ENVIRONMENT

The CRC SmartWasher® is a bioremediating parts washing system designed to clean dirty equipment parts during repair and maintenance operations - safely. The system combines 3 essential components – the SmartWasher® parts washer, the Ozzyjuice® cleaning fluid, and the OzzyMat® filter that contains a proprietary blend of microbes.

The SmartWasher® heats and circulates the Ozzyjuice® and the Ozzyjuice® cleans the parts. The OzzyMat® releases the microbes into the cleaning fluid to break down and eat oil, grease and carbon-based contaminants, creating a self-cleaning system that does not generate hazardous waste.

The SmartWasher® system harnesses the power of nature to deliver exceptional cleaning performance while also eliminating the need to handle or dispose of hazardous waste, making it a safer choice over manual solvent or aqueous-based parts washers.

WHAT IS BIOREMEDIATION?

Bioremediation is the use of microbes to break down and "eat" oil, grease, and carbon-based contaminants. This proven biotechnology is used to assist in the clean-up of wastewater treatment ponds and lagoons in petroleum refineries and industrial manufacturing facilities all around the world.

OIL CONTAMINANTS ENTER THE SOLUTION AS PARTS ARE WASHED.

SURFACTANT IN OZZYJUICE® SOLUTION EMULSIFIES THE OILS.

EMULSIFIED OIL IS EATEN BY THE OZZY® MICROBES.

OIL IS CONVERTED INTO WATER AND CARBON DIOXIDE.

THE PERFORMANCE ADVANTAGE

It works! CRC SmartWasher® is effective, even on the toughest carbon, grease, gunk and oils.

EXCEPTIONAL CLEANING POWER

Meets or exceeds the cleaning performance of manual solvent and aqueous parts washers

SELF-CLEANING SOLUTION

The bioremediation process keeps the fluid clean and ready to use

MOBILE OPTIONS

Save time by bringing the washer to the parts instead of the parts to the washer

THE COST ADVANTAGE

When you compare traditional parts washers against the CRC SmartWasher®, the savings are clear.

OZZYJUICE® DEGREASING/CLEANING SOLUTION

WHAT IS OZZYJUICE®?

OzzyJuice® is a powerful, aqueous-based degreasing/cleaning solution that is pH-neutral, non-irritating, non-flammable, and non-hazardous. Armed with superior cleaning capability, OzzyJuice® solutions will match or surpass the performance of premium solvents without the associated risks.

OZZY® MICROBES KEEP THE OZZYJUICE® CLEAN AND STRONG.

Microbes (Ozzy®), introduced into the SmartWasher® system through the OzzyMat®, eat the grease, oil and other contaminants, creating the harmless by-products of carbon dioxide and water.

CLEAN OZZYJUICE® MEANS CLEAN PARTS.

The OzzyJuice® degreasing/cleaning solution cleans dirty parts and the Ozzy® microbes clean the OzzyJuice®, leaving it strong and clean for every use. If the unit is maintained according to the operating instructions, you should never need to haul away dirty cleaning fluid again.

FL-4 MULTI-LAYER OZZYMAT®

Designed for applications with normal to heavy usage, the FL-4 Multi-Layer OzzyMat® has (4) white layers and (1) blue layer. The white layers on the mat trap any particulate larger than 50 microns and should be peeled away once a week for optimum performance. The blue layer is the support structure that contains the microbes (Ozzy®) and delivers them into the system. These microbes (Ozzy®) migrate from the OzzyMat® into the Ozzyjuice®, located in the SmartWasher® tank, and break down oil and grease.
