CRC **SmartWasher**[®]
BIOREMEDIATING parts washing system

A NON-HAZARDOUS PARTS WASHER THAT WORKS

BENEFITS:

- Bioremediating
- Non-Hazardous
- Non-Flammable
- pH Neutral
- Non-Irritating
- Less Expensive To Use Than Harmful Solvents

FEATURES:

- 400 Lb. Load Capacity
- Mobile Dolly with Locking Casters
- Large, Oversized Sink
- Interchangeable Brush Capability
- Heated Adjustable Thermostat
- Rugged Construction for Demanding Jobs

SPECIFICATIONS:

- Overall Dimensions: 43"x27"x42"
- Inside Sink Dimensions: 27"x23"x8"
- Load Capacity: 400 lbs.
- Controls: Toggle Switch
- Adjustable Thermostat: 105° - 115°
- Flow Control Timer: 10 Minutes
- Pump Capacity: 300 gph
- Certified: ETL (UL/CSA) CE
- Parts Washer Construction: Heavy Duty HDPE

how it works

The SmartWasher® Bioremediating Parts Washing System is both self-cleaning and deregulated. Through the process of bioremediation the SmartWasher constantly maintains the cleanliness of the OzzyJuice® cleaning/degreasing solution without the need for hauling, skimming or evacuating the unit. Microbes (Ozzy's®), introduced into the SmartWasher system through the OzzyMat®, break down the grease, oil and other contaminants, cleaned off the dirty parts, and create a harmless by-product of carbon dioxide and water. In short, *the OzzyJuice cleaning/degreasing solution cleans the dirty parts and the Ozzy microbes clean the OzzyJuice leaving it strong and clean for every use.* In addition, if the unit is maintained properly, and according to the operating instructions, you should never need to haul away dirty parts cleaning fluid again.

OZZY® MICROBES INSIDE

OZZY MICROBES KEEP THE OZZYJUICE CLEAN AND STRONG.
CLEAN OZZYJUICE MEANS CLEAN PARTS.

SW-37 Mobile Heavyweight

THE OZZYMAT : The Key To The SmartWasher System

THE OZZYMAT, (IMPREGNATED WITH OZZY® MICROBES), IS THE KEY TO MAXIMIZING THE PERFORMANCE OF THE SMARTWASHER SYSTEM AND THE OZZYJUICE DEGREASING CLEANING SOLUTION.

- **THE OZZYMAT** traps particulate down to 50 microns in size but more importantly contains Ozzy's® (microbes). The Ozzy microbes, impregnated in the OzzyMat, are transported along with the OzzyJuice into the SmartWasher tank. These natural occurring Ozzy® microbes eat the grease, oil, and other contaminants cleaned off the dirty parts and create a harmless by-product of carbon dioxide and water. This bioremediation process leaves the OzzyJuice clean and strong and ready to use time after time without the need to change, evacuate or haul away dirty parts washing fluid.
- **CHANGE THE OZZYMAT ONCE A MONTH TO MAINTAIN CLEAN OZZYJUICE.**
- **HEATED OZZYJUICE®** flows through the nozzle, and flow-through brush, onto the dirty part, then travels through the OzzyMat and into the SmartWasher tank. OzzyJuice is a powerful, aqueous based degreasing solution that is pH-neutral, non-hazardous, non-flammable, and non-toxic. Armed with superior cleaning capability, the OzzyJuice solutions will match or surpass the performance of a premium solvent without all the associated risks. All OzzyJuice solutions are certified by both NSF and AQMD.
- **THE 300 GPH RECIRCULATING PUMP** pulls the OzzyJuice from the tank and sends it back through the nozzle and brush - ready to clean more dirty parts.
- **THE OZZY MICROBES** do their job eating the grease, oil and other contaminants, cleaned off the dirty parts, creating a harmless by-product of carbon dioxide and water, leaving the OzzyJuice clean and strong and ready to use.
